

Gerald Nika

Mid-Level Full-Stack Web Developer

+355 69 672 6810 | geraldgnika@gmail.com | linkedin.com/in/geraldgnika

GitHub: github.com/geraldgnika | **Portfolio:** geraldgnika.github.io

I build scalable web apps with **Angular, React, Node.js, Express.js** and **Laravel**. Experienced in creating reusable components, RESTful APIs, and optimizing performance.

EXPERIENCE

Freelance Full-Stack Web Developer | May 2024 – Jun 2025

- Full-stack web app with Angular, Node.js, and MongoDB for browsing, booking, and paying for events.
- Next.js and Firebase web app for searching recipes, planning meals, generating shopping lists, and managing user profiles.
- Laravel, Vue.js and MySQL web app for managing portfolios/blogs with media uploads, dynamic pages, and role-based access.
- React, Node.js and PostgreSQL web app for posting jobs and applying, with search, filtering, and dashboard analytics.

Full-Stack Web Developer | ARK IT – Tiranë, AL | Jan 2024 – May 2024

- Built a reusable web-based video player component using Node.js, Express.js, and Vue.js.
- Implemented CRUD for annotations, cue points, subtitles, live transcription, video upload, playlists, and thumbnail generation.
- Integrated video-js for playback and structured the project in a mono-repo architecture for multi-project use.
- Explored Python & PyTorch for supervised learning, fine-tuning GPT models, and AI experimentation.

Back-End Web Developer | ArkEvo Group – Tiranë, AL | Jan 2023 – Jan 2024

- Developed 3 client CRMs end-to-end with Laravel, including invoicing, reporting, and admin dashboards.
- Implemented roles/permissions and notification systems using Laravel Spatie.
- Integrated DataTables for advanced data management and 3CX for real-time communications.
- Added task tracking and real-time notifications for improved process management.

Full-Stack Web Developer | IT-Works – Tiranë, AL | Nov 2021 – Jan 2023

- Contributed to an insurance management portal using Angular, Django REST, and Ionic, fixing bugs and adding features.
- Built an Ionic mobile app for a judicial platform.

Full-Stack Web Developer | New Media Communications – Tiranë, AL | Jun 2020 – Nov 2021

- Developed dynamic front-end interfaces with Angular and Angular Material.
- Built back-end systems with Laravel, improving integration and reliability.
- Created custom Bootstrap themes for consistent branding and UX.

EDUCATION

B.Eng. Software Engineering | **Canadian Institute of Technology** – Tiranë, AL | Oct 2017 – Jun 2020

SKILLS

Programming & Scripting:	JavaScript, TypeScript, Python, PHP, SQL, HTML, CSS
Front-End:	Angular, React.js, Vue.js, Ionic, Next.js, Tailwind CSS, Responsive UI/UX, Performance Optimization
Back-End:	Node.js, Express.js, Laravel, Django REST Framework, Prisma ORM, Firebase, User Authentication, REST APIs
Databases:	MongoDB, MySQL, PostgreSQL
Testing:	Jest, Jasmine, Karma, Protractor
Concepts:	OOP, Design Patterns
Version Control:	Git
Machine Learning & Data Science	TensorFlow, Keras, scikit-learn
Data Analysis & Visualization	pandas, numpy, matplotlib

LANGUAGES

Albanian – Native | **English** – Advanced (*CI, IELTS Academic*) | **Turkish** – Basic (*A2*)
